

Piotr Biernacki

Piotr Biernacki has 19+ years of experience in capital markets, compliance and sustainability management. He is Vice President of the Polish Association of Listed Companies and President of the Foundation for Reporting Standards. Previously he has been advising companies listed on the Warsaw Stock Exchange, Euronext and OMX in strategic investor relations, managing i.a. 45 successful IPOs, SPOs and bond offering after starting his professional carrier at the Polish Financial Supervisory Authority.

Piotr initiated creation of the Non-Financial Information Standard, a reporting framework applied by companies disclosing non-financial statements according to the 2014/95/EU Directive. The standard has become the most commonly used framework in Poland for reporting non-financial information, chosen by the largest group of companies obliged to disclose annual non-financial reports. Previously he has also been co-author of General Reporting Standards 1 and 2, which are tools helping companies to identify price sensitiveness of inside information under the Market Abuse Regulation.

His analytical works include i.a. the first full database of non-financial reports disclosed in a EU member state and creation of MARopedia, the only existing online encyclopaedia covering the Market Abuse Regulation. He has also initiated and managed several studies of companies concerning i.a. compliance with human rights, usage of fuels and energy and depth of corporate growth strategies.

Piotr is a public speaker at ca. 40 conferences and congresses every year, covering such topics as non-financial reporting, sustainable finance and disclosure of inside information. Since 2017 he has helped several companies to assess materiality of non-financial issues and to identify non-financial risks using his Materiality Assessment Matrix methodology.
